

Charitable Networking Token \$COUGAR Whitepaper v1.0.0

<https://cougarcoin.org/whitepaper>

## **A Bridge to the Future**

I would like to explain our experiment in combining avant-garde cryptocurrency technology with philanthropy to support the efforts of the National Wildlife Foundation to build a “natural-bridge” for cougars in LA. Hundreds of California cougars are killed by cars every year. This tragic event also puts drivers at risk as well. This document will outline our future plans to keep this project alive and engaging. We’ve decided to assist the NWF by creating the COUGAR token for supporters to donate and also be rewarded for their contributions. COUGAR is a deflationary, frictionless yield farming, auto-liquidity injecting token introduced to the Binance Smart Chain on Thursday the 28th of April with the ticker COUGAR.

## **Tokenomics**

Total supply - 1,000,000,000,000,000,000

Initial Burn - 500,000,000,000,000,000

Locked Dev Wallet - 50,000,000,000,000,000

## **COUGAR employs 4 functions:**

1% Reflection

1% Burn

2% LP Acquisition

6% Charity

Each trade and transfer is taxed a 10% fee.

The Cougar foundation has been delegated a wallet with 15% of the liquidity, and at least \$1000 a day has been donated to the foundation. Ownership of the token has been renounced, this is now in the hands of the community. This whitepaper will elaborate on our plans to keep this project alive through the power of NFT’S, compassion and unity.

*COUGAR is a community driven, fair launched DeFi Token.*

## Constructing a WorldBridge

**NFT** - Cougar Coin is home to many artists around the world that donate original art for our NFTs. We will have ongoing NFT contests throughout the life of our mission, and the winners will have their NFTs minted, with the profits split 50/50 with the artists and the charity. NFT's are not limited to visual media.

We have garnered an ever growing alliance of painters, digital artists, poets and musicians to create cutting-edge multimedia collectibles. The potential of fusing creative expression with the future of finance has pushed our ambitions here and as we shoot for the stars we will always aim to put our PRIDE on the moon. We send a resounding roar to any artists far and wide who wish to contribute to the project.

*"In wildness is the preservation of the world"*

**Henry David Thoreau**

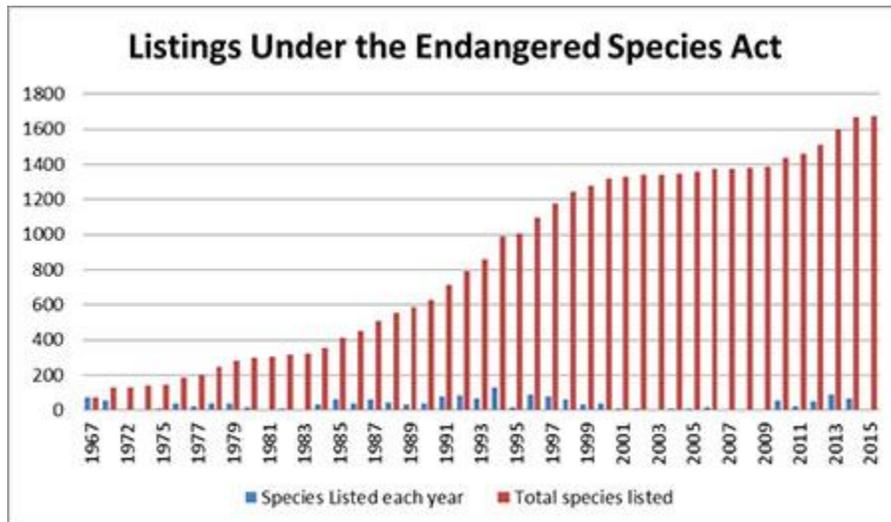

**Cougar Den** - The advent of frictionless yield farming has made staking tokens for a non-sustainable APY ratio with the risks of impermanent loss obsolete. We choose instead to implement the Copachi prize system- investors will be given the option of depositing a portion of their holdings for a chance to win NFTs and various prizes. This is an entirely optional benefit for those who wish to try their luck in the den. A fully functional version of the DApp will be available on the website soon.

## Uniting the Pride

**Worldbridge Governance Token** - Become part of the PRIDE! Own the right to have a voice within the community and to assist with future charities. COUGAR holders will be airdropped WORLDBRIDGE tokens 2/1. Holders will receive ONE(1) WORLDBRIDGE token for every TWO(2) COUGAR tokens held in the wallet during the snapshot.

**Cougar Charity Video Game** - Earn COUGAR by playing a blockchain based charity video game influenced by the highly successful game Axie Infinity on the Ethereum network. A playable demo is in development and will be presented to the community in the near future.

**Global Endangered Species Advocacy** - Our work has just begun!

There are so many organizations that need help with funding their noble cause to save an endangered animal.

Join the PRIDE and be part of our long-term goal to help where we can.

On behalf of all wild cats worldwide,

we sincerely thank you

for extending a paw towards our future!
